EDUCATION

Geneva Graduate Institute <i>PhD in International Economics</i> GPA: 5.57/6.00 <i>Master's in International Economics</i> Rudi Dornbusch Prize for Best Master's Thesis in International Economics	Geneva, Switzerland Sep. 2022–2027 (expected) Sep. 2020–2022
University of Toronto <i>Honours Bachelor of Arts in Economics</i> Major in Economics; Minors in Statistics and Philosophy; completed four-year degree in three years	Toronto, Canada Sep. 2017–2020

RESEARCH

Chokepoint: The Financial Effects of Rare Earth Supply Disruptions • Construct a novel high-frequency measure of rare-earth supply shocks from news events; estimate effects on equity returns for 6,000 publicly traded firms. • Disruptions associated with Chinese export policy disproportionately reduce valuations of firms in industries reliant on difficult-to-substitute rare-earth inputs.	<i>Job Market Paper</i>
Energy Supply Shocks and Electricity Substitution • Estimate how electricity generation across fossil-fuel and renewable sources responds to exogenous oil and gas supply shocks using monthly cross-country data and local projections. • Study substitution across electricity sources and heterogeneity in responses across countries and over time.	<i>Work in Progress</i>
From Climate Risk to Growth-at-Risk: Downside Risks to Growth from Temperature Shocks • Estimate the effects of temperature shocks on the distribution of future economic growth, including downside tail risk. • Awarded the Rudi Dornbusch Prize for Best Master's Thesis in International Economics.	<i>Master's Thesis</i>

PROFESSIONAL EXPERIENCE

Organisation for Economic Co-operation and Development (OECD) <i>Consultant</i> • Constructed an updated bilateral capital-flow dataset and estimated capital-account volatility across countries. • Assessed the causal effects of geoeconomic fragmentation on bilateral capital flows.	Sep.–Dec. 2024
Centre for Economic Policy Research (CEPR) <i>Consultant</i> • Developed and presented a research proposal on carbon-offset markets with Prof. Beatrice Weder di Mauro for the Gold Standard carbon-offset registry. • Constructed a supplier-level dataset to estimate determinants of carbon-offset prices, including project costs, location, Sustainable Development Goal benefits, and supplier characteristics.	Sep. 2022–Jan. 2023
World Trade Organization (WTO) <i>Intern</i> • Co-authored research examining the effects of vaccination campaigns and lockdown stringency on economic growth and international trade; research cited by WTO Director-General Ngozi Okonjo-Iweala. • Estimated trade-finance availability and the potential benefits of closing the trade-finance gap in ECOWAS countries in a joint project with the International Finance Corporation.	Apr.–Sep. 2022

TEACHING EXPERIENCE

Geneva Graduate Institute <i>Teaching Assistant</i> • Macroeconomics II — Profs. Cédric Tille and Philippe Bacchetta, 2025–2026 • Microeconomics I — Prof. Yuan Zi, 2024–2025 • Sustainable Finance and Impact Investing — Prof. Beatrice Weder di Mauro, 2022–2023 • Finance, Development and Inclusion — Prof. Nathan Sussman, 2023 • Empirical Methods for Evidence-Based Policy Research, 2023	2022–2026
